

## **MAKE-UP ASSIGNMENT**

### **COMPARATIVE CRIMINAL LAW**

Choose a country other than a common law country. Analyze its Criminal Law, focusing on the theory of offence of that country, i.e., you need to answer the question “what is a crime in that country?” For example, if you chose a common law country you would have to explain that a crime is an actus reus performed with a certain mens rea, provided that there are no defences. After the general analysis of the concept of crime in the selected jurisdiction, exemplify the notion of crime by analyzing one crime, e.g., homicide, theft, sexual assault, etc. Write down your analysis.
